Literature Review

The birth of any theory is closely related to its historical and theoretical background, and the emergence of Perry Anderson's political critical thinking is closely related to its era and the theory it accepts. In the 1920s and 1930s, on the one hand, with the end of World War I, the abdication of the German Emperor, and the end of the century long rule of the Austro-Hungarian Empire, liberalism began to shift towards monopolistic capitalism (Lukacs, 2013); On the other hand, with the victory of the October Revolution in Russia, socialism emerged in practice. Under the challenges posed by both the "left" and "right" aspects of classical liberal economic theory, neoliberalism began to emerge on the stage of history, which also had a certain impact on Western Marxists (Mudge, 2018).

Some left-wing scholars chose to abandon their positions and defect to the opposite side when facing neoliberalism, greatly weakening the left-wing camp to a certain extent (Petras, 2018). Perry Anderson, a pioneer figure of the Western left-wing, had to retreat from theory and return to his study to study the history of thought in the face of the strong attack of neoliberalism (Anderson et al., 2023). At the end of the 20th century and the beginning of the 21st century, with the arrival of the 1997 Asian Storm and the 2008 financial crisis, the world pattern underwent earth shattering changes (Tooze, 2018). On the one hand, the Cold War ended and the trend of world multipolarity did not develop. On the other hand, the drawbacks of neoliberalism continued to be exposed, which created external conditions for the formation of Perry Anderson's political critical thinking (Blackledge, 2000). As (Blackledge, 2001) pointed out in his article, "After entering the 21st century, especially after the global financial crisis in 2008, Anderson shifted from criticizing the ideology and culture of neoliberalism to thinking about the problems of contemporary capitalist countries." Through reading Perry Anderson's 21st century works, it is not difficult to find that his ideas have shifted from cultural criticism of capitalism to political criticism.

In 1976, Perry Anderson's representative work "Exploration of Western Marxism" was published. Two years later, David McGregor from the London School of Economics and Political Science summarized in his book review that the reason for the failure of the Western left-wing student movement in the late 1960s was: "They had neither political theory to explain the popular representative government in developed Western countries, nor enough economic theory to challenge the confident state capitalism at that time. Even Anderson himself almost despairingly admitted that Marxism by Adorno, Althusser, and others had been on the verge of death, and thus drew more conclusions that needed to be done in the political and economic theory research of Marxism." This was not only a reflection of the failure of the Western left-wing student movement in the late 1960s. The summary is also a summary of the later development of Marxism abroad (Davis, 1986).

In the 1970s, political Marxism, represented by Robert Brenner and Ellen Meiksins Wood, emerged. As one of the important schools of Marxism abroad, political Marxism emphasized the reconstruction of the historical materialism system, highlighted the definition of concepts such as productivity and production relations, economic foundation, and superstructure, and provided theoretical support for Perry Anderson's political critical theory (Brenner, 2016).

In the 21st century, capitalist society has undergone significant changes. With the development of technology, the contradiction between capital and labour has become more complex and diversified. The weakening of neoliberalism and the rise of populism have also led Western Marxist scholars to criticize capitalism not only in terms of culture, but also gradually presenting a multidimensional perspective (Patomäki, 2021). In 2000, Perry Anderson returned to "New Left Review", published an article in "Renewals", and proposed the slogan of "uncompromising realism". "Starting from reality, Perry Anderson rethought and formulated strategies to criticize capitalism and conceive socialist alternative choices (Yúdice, 2018). While inheriting and developing classical Marxist theory, Perry Anderson objectively analysed the social background at that time. Criticized the Western world led by the European Union and the United States, At the same time, we are also trying to find new options for building socialism (Hough, 2010).
